| Software Purpose & Scope

Empowering Financial Stability

The system helps individuals manage personal finances efficiently by providing a user-friendly platform for tracking income, expenses, and savings.

- ✓ **Goal:** Achieve financial targets & travel plans.
- ✓ **Target:** Users in Egypt and the Arab region.
- ✓ **Access:** Mobile and Web availability.

Simple tracking for better financial decisions.

| Core Functional Requirements

Access Control

Registration, Login via OTP/PIN, and secure profile management.

Transaction Mgmt

Add income/expenses, categorization, and balance auto-updates.

Budgeting

Define spending limits per category and track remaining balances.

| Insights & Automation

Savings Goals

Create targets for vacation or education with progress tracking.

Auto-Sync

Link bank accounts and e-wallets via APIs for real-time tracking.

Reporting

Generate PDF/CSV reports and visual charts for spending patterns.

| Non-Functional: Performance

<3s

Login Screen Load

<5s

Report Generation

10k

Simultaneous Users

The database is optimized to handle up to 1 million transactions per user without performance degradation.

Data Security & Trust

User financial data is the top priority. We implement industry-standard encryption and protocols to ensure privacy.

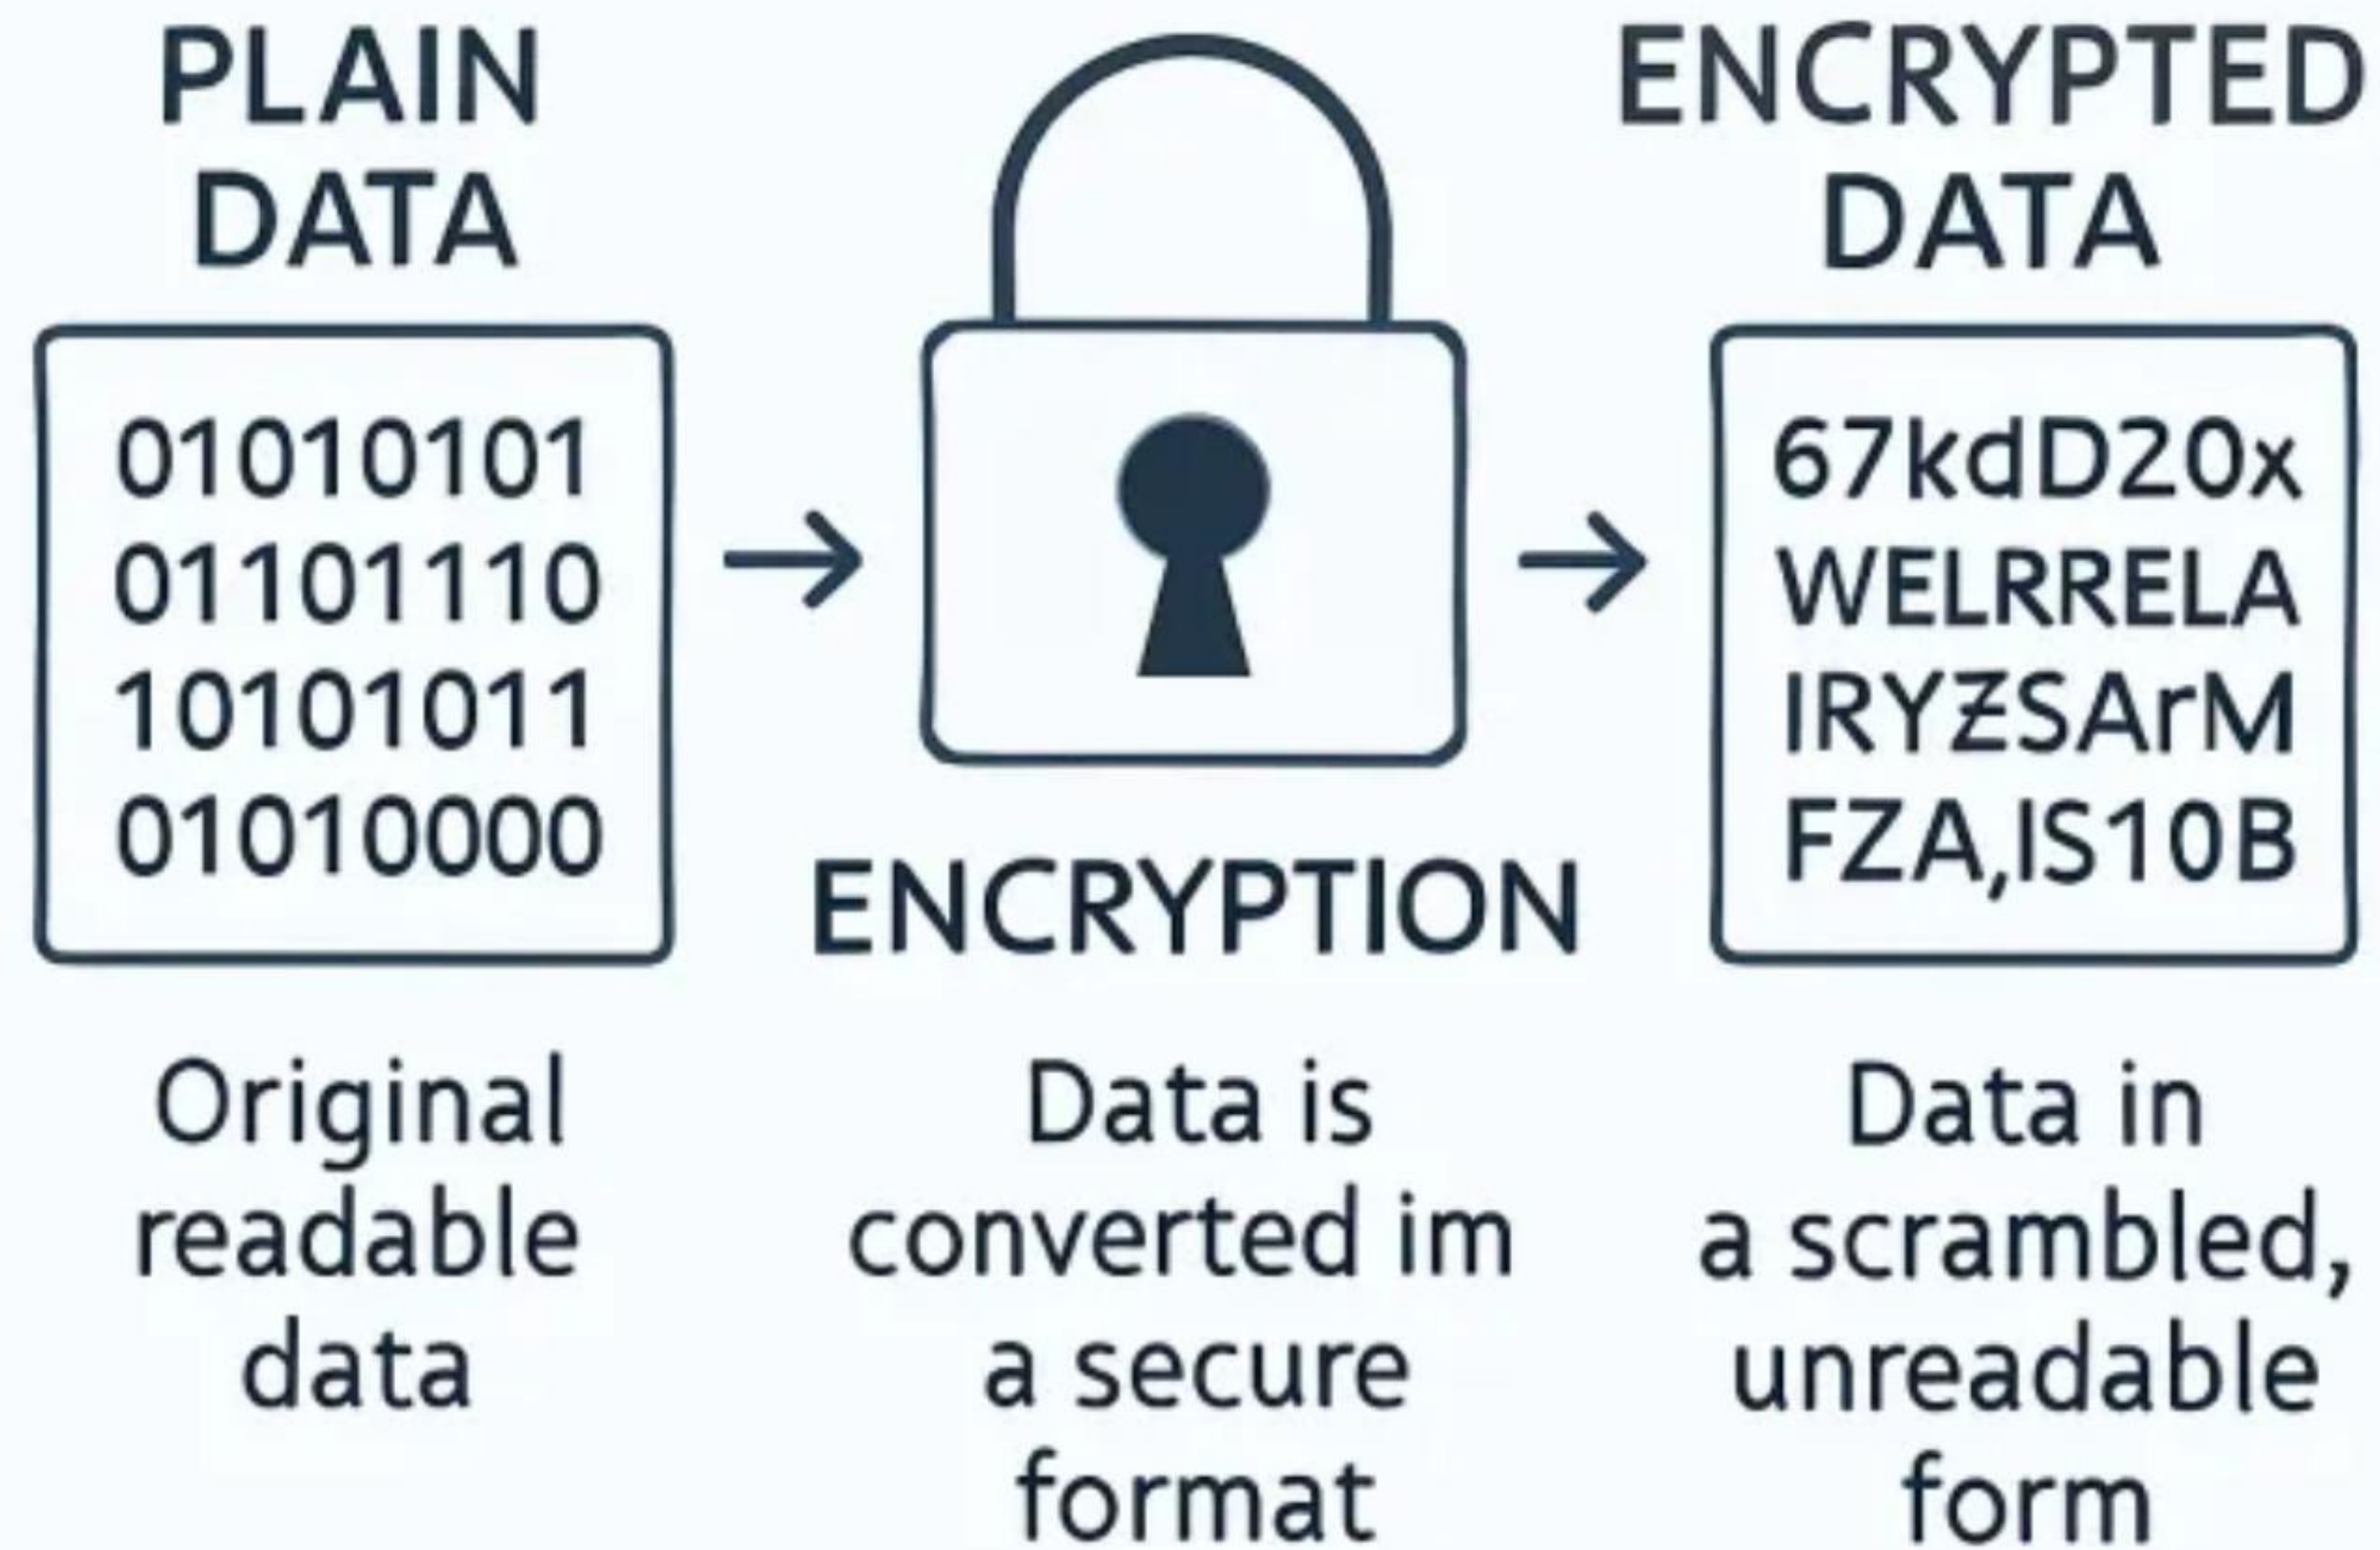

🔒 AES-256 Encryption at rest.

🛡️ TLS 1.3 Protocol for transmission.

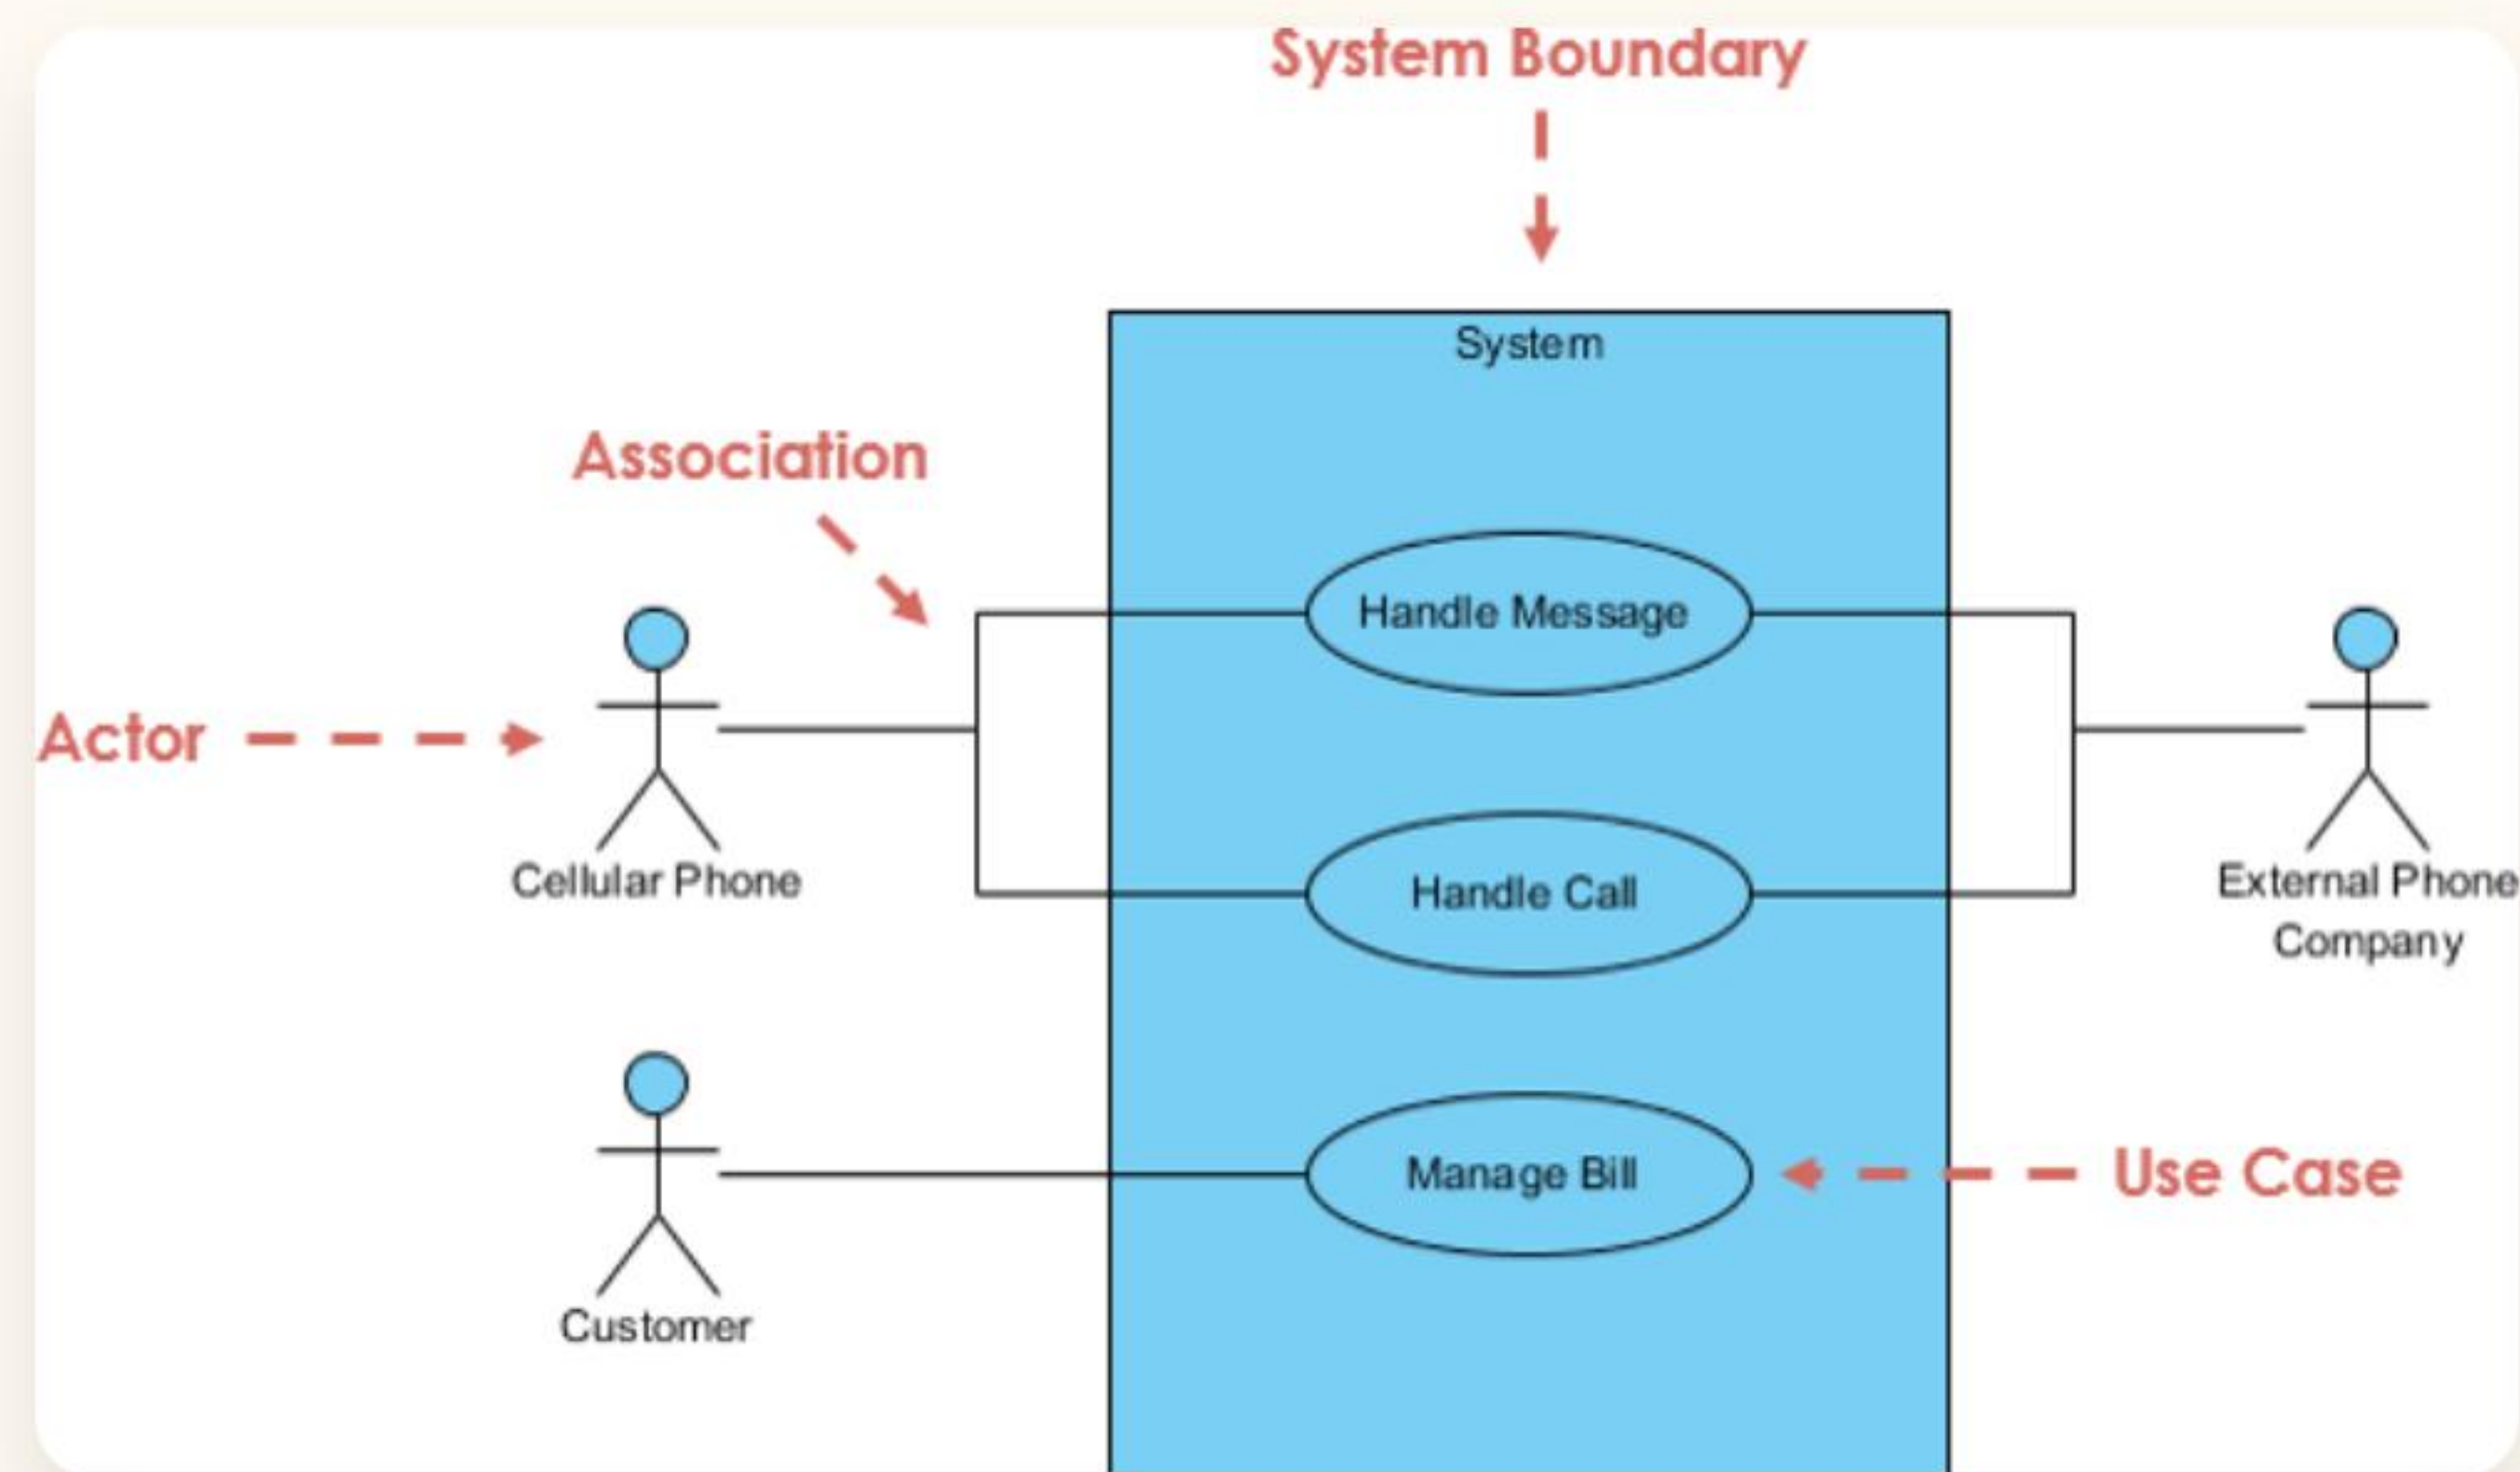

🔑 bcrypt password hashing.

🏛️ OAuth 2.0 for bank integration.

HOW DOES ENCRYPTION WORK?

| System Actors & Roles

1. Registered User: Primary actor. Logs transactions, sets goals, and links accounts.

2. External Systems: Banks and E-Wallets providing real-time transaction sync via API.

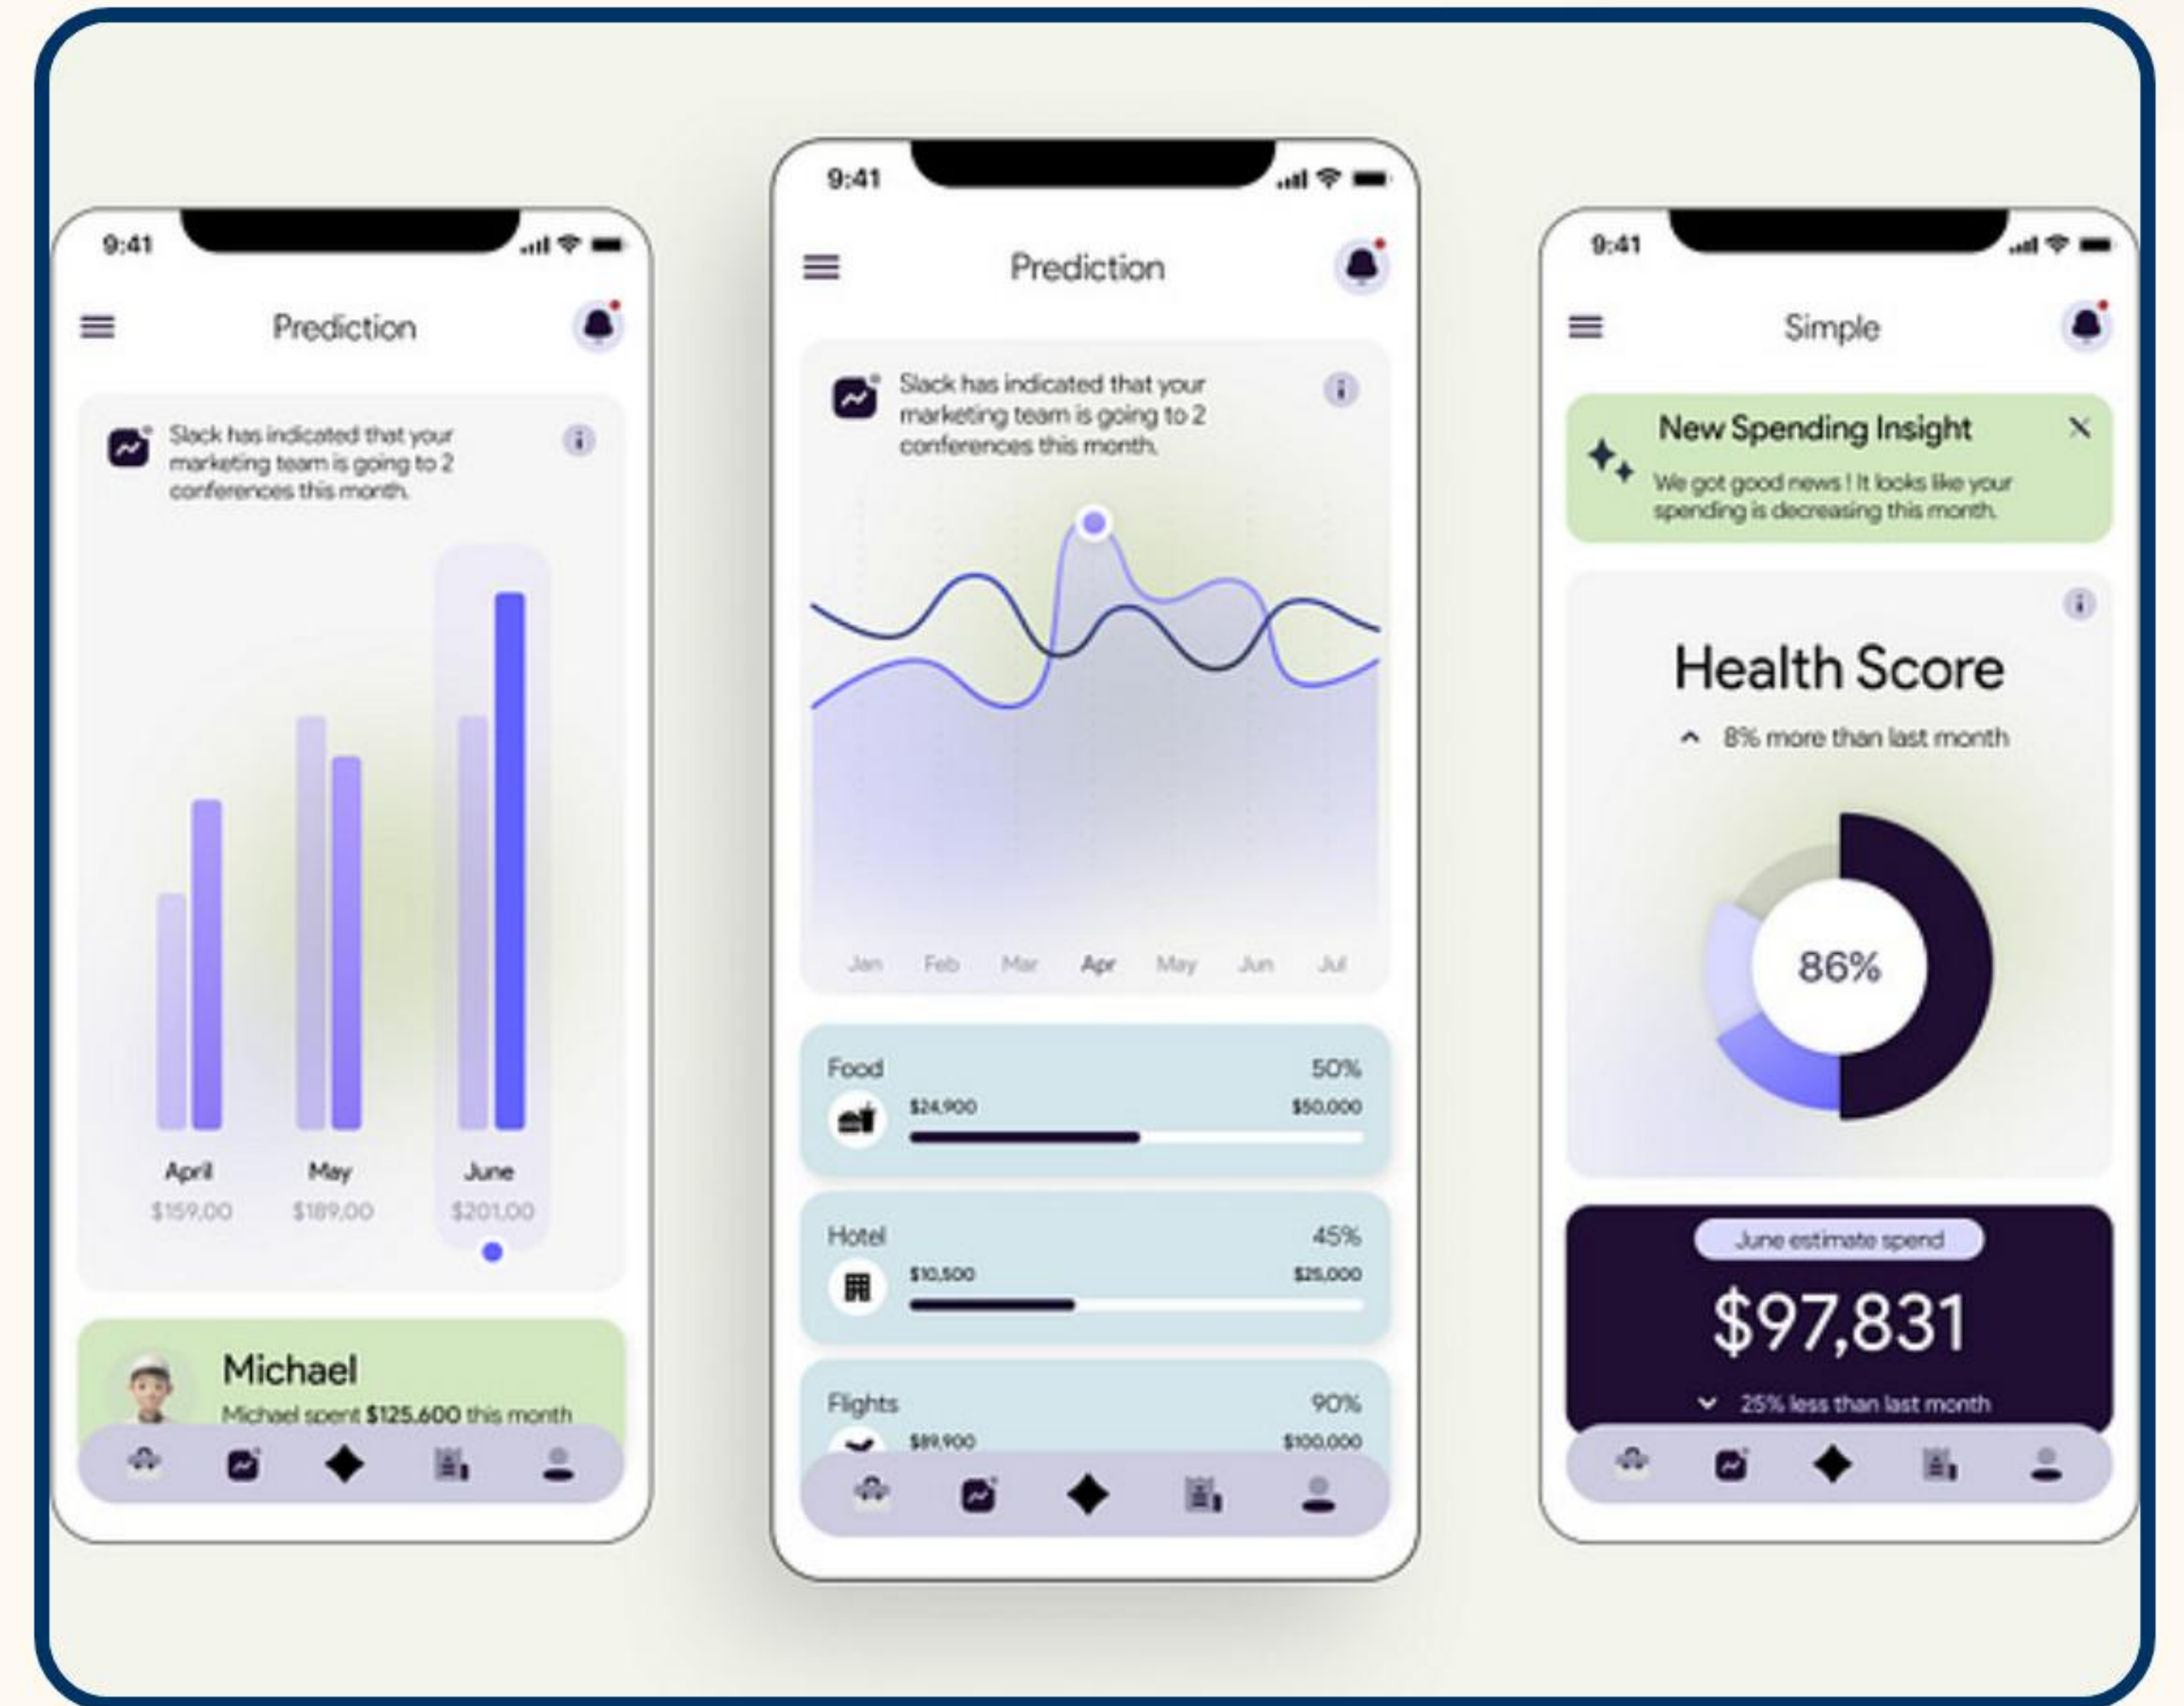

3. Admin: Platform maintenance, user management, and default category configuration.

Dashboard Overview (UX)

The **Dashboard** provides a high-level snapshot of financial health immediately upon login.

Balance: Total Income - Total Expenses

- Quick access to recent transactions.
- Visual progress bars for budgets.
- One-click "Add Transaction" button.

| Budget Over-Limit Alerts

The system calculates budget usage in real-time. If a transaction causes spending to reach **100% or more**, a critical alert is triggered.

Food & Dining Budget

115% Exceeded

⚠ Alert: You've exceeded your \$200 budget by \$30!

| Availability & Reliability

Metric Type	Target Goal	Constraint
System Availability	99.5%	Excl. Maintenance
Max Downtime	< 4 Hours	Per Month
Calc Accuracy	99.9%	Financial Precision
Backup Freq	24 Hours	Auto-Cloud Backup

Responsive & Portable

Our architecture ensures visual consistency across Android (8.0-14.0), iOS (13.0-18.0), and all modern web browsers (Chrome, Firefox, Safari).

Mobile Native

Web Portal

Responsive Tablet
